Summary

Final-year Information Technology student with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, and Software Development. Experienced in building full-stack web applications using JavaScript, Node.js, React.js, and SQL/NoSQL databases. Skilled in backend development, REST API design, and problem-solving, with an interest in cloud-based SaaS platforms and financial technology solutions.

Technical Skills

Programming Languages: C, C++, Java, Python, JavaScript, TypeScript

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Frontend: HTML, CSS, React.js, Next.js

Backend: Node.js, Express.js

Databases: MySQL, MongoDB

Tools & Technologies: Git, GitHub, REST APIs, Postman, Docker

AI & Automation: LLM Applications, RAG Fundamentals, AI Agent Workflows, Vector Embeddings

Projects

Budget Tracker — AI-Powered FinTech Platform GitHub

- Designed and developed a full-stack financial tracking application using Next.js and Node.js.
- Integrated Google Gemini APIs for intelligent receipt analysis and transaction categorization.
- Developed secure REST APIs with authentication and role-based access control.
- Implemented MongoDB-based data management for financial records and reporting.

Crop Mart — Agricultural Bidding Platform GitHub

- Developed a full-stack web application enabling farmers to list crops and buyers to place competitive bids.
- Designed and implemented RESTful APIs with secure authentication and role-based access control.
- Structured and optimized the database schema for crop records, users, and bid history.

Smart Weather Device (ESP32, Python, C++) GitHub

- Developed an embedded Edge AI system using DHT11 sensors for environmental monitoring.
- Implemented heat index forecasting and optimized ML inference for low-power deployment.

Research Experience

AgriBid: A Web-Based Multi-Format Auction Platform for Enhanced Agricultural Market Access

Presented at TechSpark 2026 State-Level Technical Symposium, MMCOE Pune — April 2026

- Co-authored and presented a research paper on a digital agricultural auction platform enabling direct farmer-trader transactions.
- Proposed multi-format auction mechanisms (Normal Bid and Daily Rush) to improve price discovery and market transparency.

Education

B.Tech – Information Technology

Vishwakarma Institute of Information Technology, Pune

2023 – 2027 — CGPA: 8.7 / 10

HSC (12th Grade)

Mahatma Jyotiba Phule Mahavidyalaya, Mukhed

2023 — 76.17%

Certifications

- CCNAv7: Introduction to Networks – Cisco Networking Academy
- IBM Full Stack Software Developer Certification
- Anthropic Claude 101
- Introduction to Model Context Protocol (MCP)
